Xingu Mission Field Report

The Bouthillier Family

The Bouthillier family has been serving in Brazil for 7 years. They began their time in Brazil working in Rio Grande do Sul in an orphanage. They joined the Xingu Mission just over 5 years ago and have been working in the Porto De Moz area. They have one daughter named Amanda—3

Amanda, Christie and Richie

The Bouthillier are the leaders of the Porto de Moz base. They focus their energy on planting churches in the surrounding area and mentoring the church leaders. The Porto de Moz area is key because it is at the mouth of the Amazon River and it is a large municipality. It serves a lot of people along the river as a central place of commerce.

The Bouthilliers would like to plant three churches per year. This year they have already started in the village of Cupari and in the neighborhood of Praião. On their second visit to Cupari 23 people were saved. (Cont. on page 2)

The Bouthilliers - cont.

Christie works with the poor in the community by providing social assistance and basic health teaching. Now that Amanda is getting bigger Christie is going to help Richie out on the river ministering to the women in the community. *xm*

Church service along the river

Richie and Christie - October 2004

Marantha III - visiting communities and delivering water filters

Water Filter Project

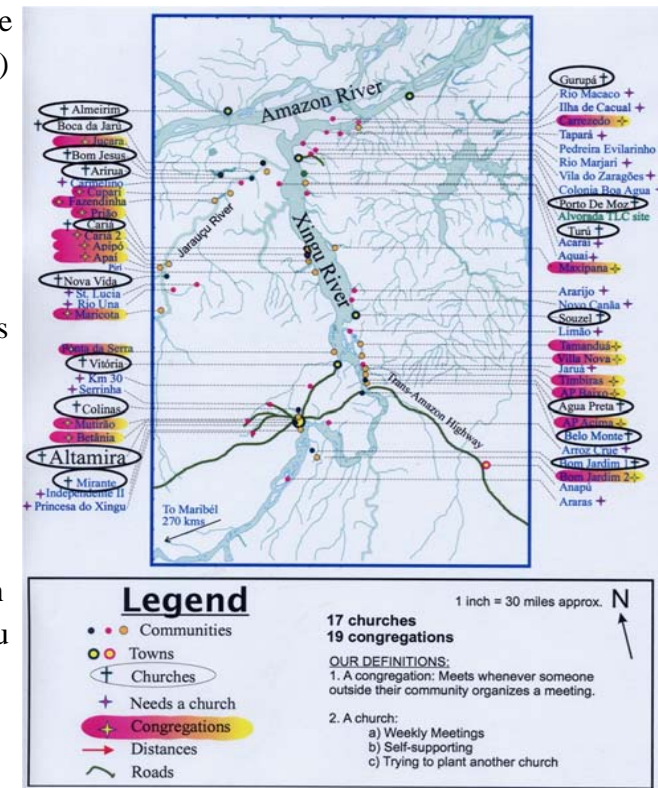

The water filter project is an outreach / social assistance program. The program is designed to create safe drinking water for the general population. The problem that exists with the water is that many people live on the flood plain and it is very difficult and costly to dig wells.

When wells are dug they become contaminated by rust or other debris. This makes the filters a viable option. The mission is able to build and install each filter for US\$50.00. This project has literally saved the lives of many along the river,

End of the Year Status Report

Growth in this ninth year has come in the number of our churches (17) and congregations (19), as well as the overall number of people committing to follow Jesus. More than numbers we are growing and maturing as a group of churches. The choice by local church leaders to become family once again with the Vineyard here in Brazil was one demonstration of team leadership making important decisions. We believe God's anointing will increase on us all in proportion to our unity. Thank you so much for your prayers and participation in 2004! *xm*

Water Filter Project - cont.

especially babies who would die of dysentery. Currently there is a two man work team building the filters daily. To date, we have installed around 400 filters. This project has been instrumental in evangelizing unreached communities and creating open doors to other communities. We are excited about this project because it provides a cost affordable water solution and at the same time creates opportunity for evangelism. *xm*
